

# **PCL's 2018 California Environmental Assembly** ***New Strategies for Chaotic Times***

**February 24, 2018 • McGeorge School of Law, Sacramento**

## California Environmental Assembly Overview

Each year PCL focuses on policy topics that are relevant and current in the California legislative process. We are planning to do so again this year with several important policy sessions as well as legal environmental issues and current court cases to watch.

Given the strong interest from last year's assembly on diversity and the shared values we all work so hard to protect and promote across California, we will be adding a topic track devoted entirely to the intersectionality of our shared values and organizational collaboration and co-advocacy strategies and plan to carry over this workshop theme to all our activities that day.

Additionally, to reach out to the next generation of advocates we will add an environmental career fair with posting of open internships and jobs from the 100+ organizations in attendance that day to encourage youth to build a career in the field and develop the job skills to do so. Empowering the younger generations to continue the work ahead is critical to all of us.

***Join the Planning and Conservation League and more than 200 advocates from over 100 organizations on February 24, 2018 at McGeorge School of Law for our Annual California Environmental Assembly.***
