

Angela Islas is a Community Development Specialist with Self Help Enterprises (SHE). Angela works in the Community Engagement and Planning team, which works to support community participation in regional water management and groundwater sustainability planning for the Northern San Joaquin Valley. Programs that she is currently working and overseeing include the Sustainable Groundwater Management (SGM) work, leading project efforts in Merced and Madera Counties under the Integrated Regional Water Management (IRWM) program Proposition 1 Disadvantaged Community Involvement (DACI) program, also leading preliminary efforts in the Central Valley Salinity Alternatives for Long-Term Sustainability (CV-SALTS) program – particularly the Nitrate Control Program, and - finally - supporting with training programs the team provides for community leadership and board capacity building Valley wide. Before joining SHE, Angela held a position as a policy advocate and community health worker for a local air quality nonprofit in Fresno, CA advocating for robust air quality, public health, and energy policies, providing a free asthma education service for low-income families in Fresno, Madera Counties, and facilitating, supporting the first collaborative air quality steering committee for the Community Air Protection Program under California Air Resources Board (CARB). She holds a B.S. in Public Health from California State University, Fresno
