

Brett Furnas Bio

Brett Furnas is a quantitative ecologist with the Wildlife Health Laboratory at the California Department of Fish and Wildlife where he leads design and analysis of wildlife research and monitoring studies throughout the state. He received his Ph.D. from UC Berkeley and previously worked for the California Air Resources Board and served as a Peace Corps Volunteer. He recently published a paper showing that low severity fire helps maintain a diversity of carnivore species, like fisher and bear, within California forests.
