

We are excited to announce the 2023 California Environmental Assembly! Come join us for exciting panels on how we can inspire action for tackling some of the greatest challenges California is currently facing.

Over the last two years, PCL has hosted our assembly virtually, and offered our panels once a week spanning the course of an entire month. This virtual format was met with huge success as our attendance rose by over 50%! People who previously couldn't attend due to time commitments and travel were now able to view and participate in our weekly sessions. Due to the overwhelming success of this format, we are planning to continue the virtual format again this year.

The title of the 2023 Assembly is *Extreme Measures for Extreme Times: What We Need to do Now*. PCL strongly believes that we are falling short of enacting measures that will curb the climate crisis fast enough to avoid catastrophic impacts. Thus, we are designing our panels this year to focus on both immediate short-term solutions and strategies for the future. The sessions will focus on the topics of water, land use, transportation, CEQA/ environmental litigation, habitat connectivity, and wildfire. The 2023 PCL Assembly will have a total of eight sessions held each Thursday starting January 19<sup>th</sup> and running through February 9<sup>th</sup>. There will be two sessions a day with one starting at 9 am the other starting at 10:45 am with the exception of our panels on February 2<sup>nd</sup>, our first panel that day starts at 10:45 am and our second panel starts at 12:30 pm and runs until 2 pm (due to accommodating state legislators' schedule).

PCL is contacting you today to discuss your sponsorship of this event. Your generous support would greatly improve the effectiveness of this event and would let your members know about your commitment to solving environmental problems in California. Our Assembly has been attended by a variety of audiences, from renowned experts to students, environmental advocates, private sector executives, agency staff, and public citizens. People from diverse programs, backgrounds, and communities attend the Assembly every year to learn how they can protect our beautiful state from the effects of man-made development and climate change.

PCL is especially proud to host the Assembly Scholarship program that invites high school, college students, and recent graduates to attend the event for free. Each year, PCL gives away over 50 scholarship tickets and offers a mentorship program for the students to connect with experts in their field of interest. In the past, PCL has also organized an Emerging Leaders Panel that invited select students to share what inspired their interest in environmental work and their big-picture ideas on how to improve the future.

Your sponsorship of the 2023 California Environmental Assembly will ...

- Promote meaningful discussions on how to inspire California to take meaningful action in response to drought, the housing crisis, and climate change;
- Allow us to expand our scholarship attendants program to invite more college, high school students and recent graduates across the state;
- Give your organization the opportunity to share your environmentally friendly message with activists, lawyers, and policymakers that may not be aware of your environmental work;
- Provide you with invaluable opportunities to forge new relationships with leaders in state, regional and local policy-making and advocacy and learn about emerging policy trends;
- Further your mission and vision with wider participation from an in-person and virtual audience across the state.

Your generous sponsorship of this event will allow PCL to keep hosting this event each year, invest in expanding our scholarship program, and promote important discussions and actions that will determine how California responds to the crises. PCL will also invest in promoting any solutions that are developed as part of the panel conversations. Please consider making an investment in the future of PCL, California, and the world by sponsoring the 2023 Assembly today!

### **History**

Over 57 years ago, PCL was formed around concerns with California's lack of planning around growth. While the economy was booming, air and water pollution increased dramatically, our precious natural resources were not being protected, and sprawling development was committing future generations to expensive infrastructure investments.

In response, PCL helped create a body of laws that mitigated and managed the environmental impacts of future growth. PCL has worked hard over the past decades raising over \$25 billion to protect wetlands, floodplains, groundwater, wildlife corridors and agricultural lands from encroaching sprawl and to create urban parks and greenbelts. PCL also helped secure nearly \$8 billion for transit developments such as BART, MetroLink and other light rail systems.

Today PCL is focused on efforts that protect our environment, enhance equity for all Californians, support sustainable economic development, and use our tax dollars more efficiently.
