

Biography

Christine King

Directory, Gateway for Accelerated Innovation in Nuclear (GAIN)
Christine.King@inl.gov

As Director of the Gateway for Acceleration in Nuclear (GAIN) initiative, Christine King facilitates a range of public-private partnerships to help move innovative nuclear energy technologies toward commercialization, while ensuring the continued safe, reliable, and economic operation of the existing nuclear fleet. In addition, GAIN works to ensure that clean energy plans value the opportunity nuclear energy provides to meet decarbonization and sustainability goals. Ms King is regularly invited to introduce advanced nuclear energy to state legislatures, utility commissioners, energy planners, and investors. Prior to GAIN, she has worked for a venture capital firm, led a nuclear division for a consulting firm, and led long-term R&D for a non-profit, and worked in the field during nuclear plant outages.

BS in chemical engineering from North Carolina State University

MBA from Lynchburg College

Earned second-degree black belt in Taekwondo; studying Taiko drumming.
