

PCL is excited to announce that the **2024 California Environmental Assembly will be held live and in person on January 27th, 2024, at UC Davis School of Law's King Hall**. Our return to an in-person event is made possible by the California Environmental Law & Policy Center's generous offer to host the gathering!

PCL's Assembly features insightful and impactful panels on the critical issues we must tackle if we are to face climate change head-on. Recent Assemblies have led to countless advances in environmental policy; **in the last two years, almost a dozen bills have emerged from the Assembly's panels and conversations.**

The theme for the assembly is: ***Life Beyond 1.5 Degrees: Hard Truths and Solutions***. PCL strongly believes that we are falling short of enacting measures that will curb the climate crisis fast enough to avoid catastrophic impacts. We design our panels to focus on both immediate short-term solutions and strategies for the future. The sessions will focus on the topics of water law modernization, wildfire, transportation, CEQA, groundwater, and land use.

PCL is contacting you today to discuss your sponsorship of this event. **Your generous support would greatly improve this event's effectiveness and let your members know about your commitment to solving environmental problems in California.** The Assembly is attended by a variety of audiences, including renowned experts, environmental advocates, private sector executives, legislative and agency staff, students, and citizen advocates. Attendees of the Assembly both learn about and organize to protect our beautiful state from the effects of man-made development and climate change.

PCL is especially proud to host the Assembly Scholarship program, inviting high school and college students and recent graduates to attend for free. PCL gives away over 50 scholarship tickets and helps to connect students with experts in their field of interest.

Your sponsorship of the 2024 California Environmental Assembly will ...

- **Promote meaningful discussions** on how to inspire California to take valuable actions in response to drought, the housing crisis, and climate change;
- Allow us to **expand our scholarship program** to invite more college and high school students and recent graduates across the state;
- Give your organization the **opportunity to share your message with activists, lawyers, and policymakers** who may not be aware of your environmental work;
- Provide you with **invaluable opportunities to forge new relationships** with leaders in state, regional, and local policy-making and learn about emerging policy trends;
- **Further your mission and vision** with wider participation from an in-person and virtual audience across the state.

Your generous sponsorship of this event allows PCL to host this event each year, invest in expanding our scholarship program, and promote important discussions and actions that will shape the California of tomorrow. **Please consider making an investment in the future of PCL, California, and the world by sponsoring the 2024 Assembly today!**

PCL's 2024 California Environmental Assembly

Life Beyond 1.5 Degrees: Hard Truths and Solutions

California Environmental Assembly

History

Over 58 years ago, PCL was formed around concerns with California's lack of planning around growth. While the economy was booming, air and water pollution increased dramatically, our precious natural resources were not being protected, and sprawling development was committing future generations to expensive infrastructure investments.

In response, PCL helped create a body of laws that mitigated and managed the environmental impacts of future growth. PCL has worked hard over the past decades raising over \$25 billion to protect wetlands, floodplains, groundwater, wildlife corridors and agricultural lands from encroaching sprawl and to create urban parks and greenbelts. PCL also helped secure nearly \$8 billion for transit developments such as BART, MetroLink and other light rail systems.

Today PCL is focused on efforts that protect our environment, enhance equity for all Californians, support sustainable economic development, and use our tax dollars more efficiently.
